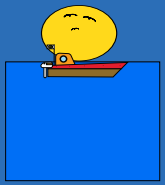
Hello from VMD 105

Hello my name is KARL.
I'm a 19 year old who lived most of my life in Germany. I decided to take this class, because I want to develop my skills using Adobe.
This is my first semester at CCSF and I'm very happy with all my classes so far. I want to pursue a carrear in graphic design.

For the final InDesign project I decided to use my favoirite colour and keep the theme of the Ocean.



INTRODUCTORY

KARL MUELLER

FIGHT

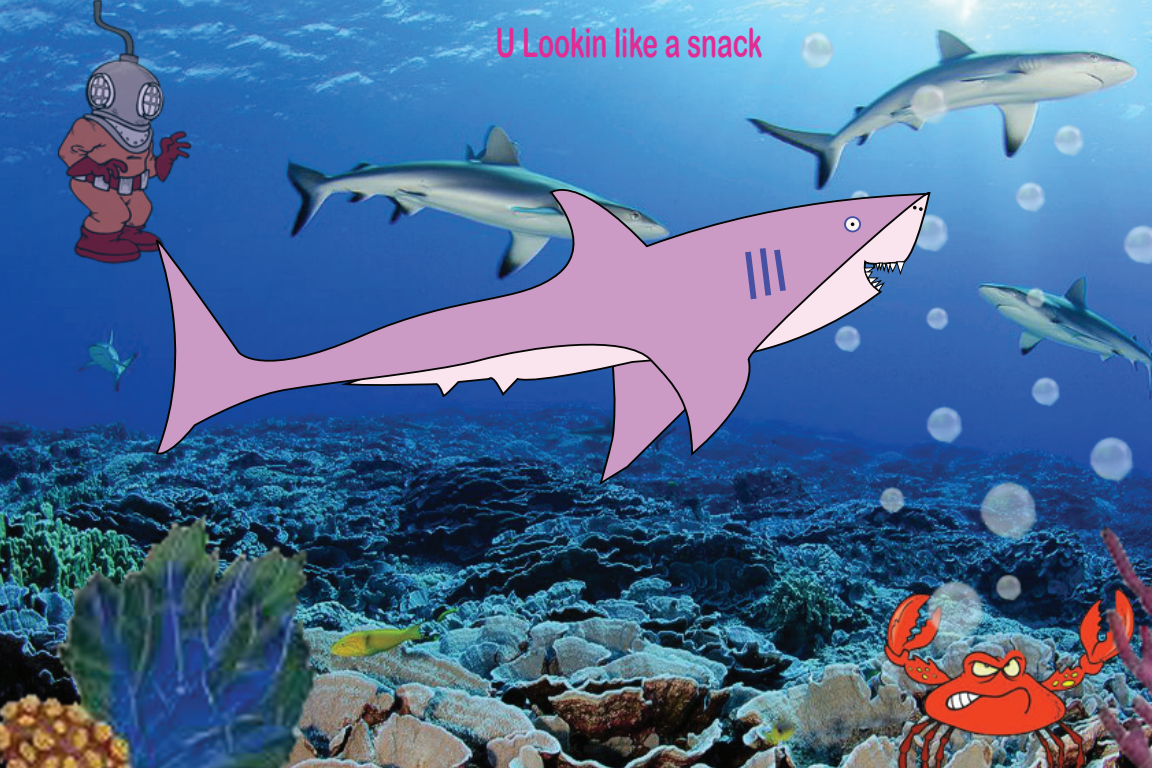
VS

ROUND 1

I think Photoshop is one of my favourite programms to use in Adobe. As a surfer I decided to go with a video game theme, that showcases a fight between a shark and me. The background has lightnigns to give the image a more dramatic feel.

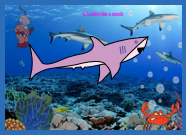
PHOTOSHOP

FINAL PROJECT



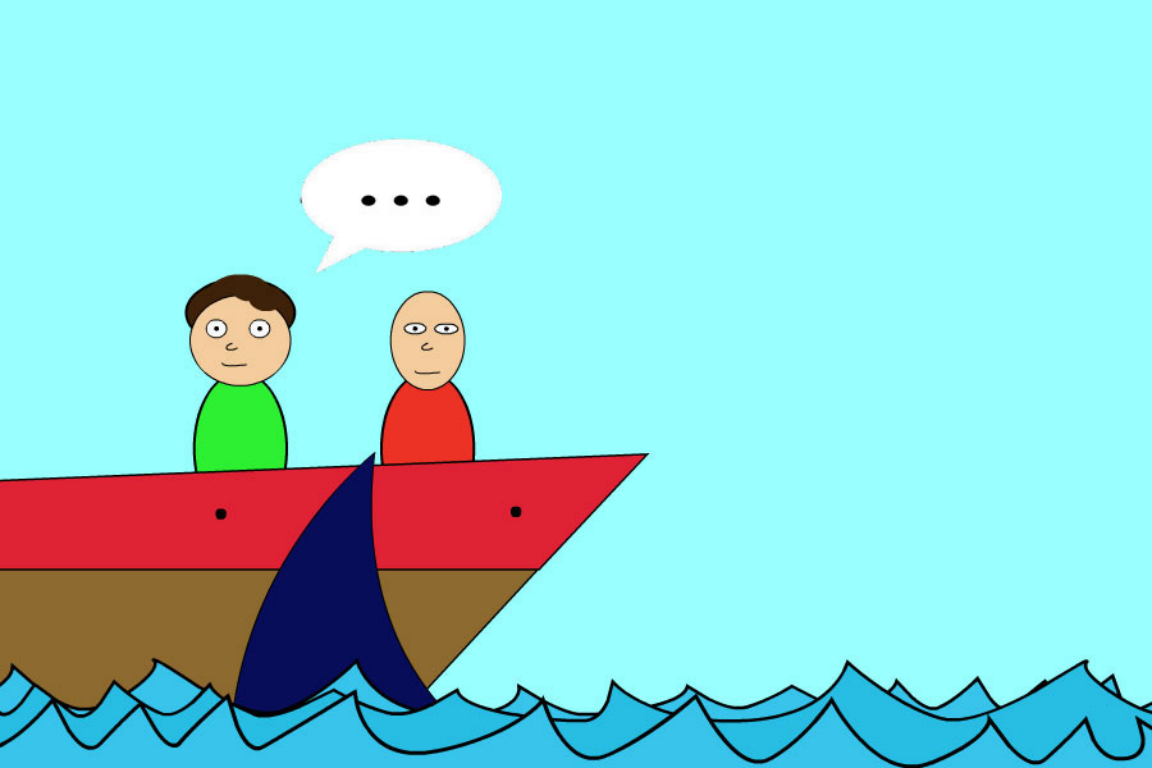
U Lookin like a snack

In my final Illustrator project I decided to stick with my ocean theme. I wanted to come up with a way of making a typical scary looking Great White shark look more friendly. I used a pink colour to make my character look more cheerful and happy. I used my vector shark and also real life photos to have a more intresting mix of animation and real life.



ILLUSTRATOR

FINAL PROJECT



Just like all my other projects I decide to use the ocean as my theme. In my first animation project I made the shark a fearful animal by adding the classic theme song of the movie JAWS and I made the shark fin very big in proportion to the boat. The characters on the boat react with a frightend way to give the storyline a little humor.
